Unfortunately after starting the game with 5 minutes in an elevator listening to poor quality dialogue, followed by 5 minutes standing in a black room, the first puzzle was chosen to be something you have to repeat 20 times without any prompting. By the time I got to that point I was over the game and didn't have high hopes for the rest of it. It's a pity because it looks like there's some interesting content in the screenshots, but the start ruined it.. Its scary, and fun.. I am not sure if i can recommend this game or not (but since i have to. I will recommend). For the price I would stay away from it until it's on sale. People say this game is really scary, but in my play through there was only 1-3 scary things that happened. The atmosphere didn't scare me like

people said it would. The scariest part to the game is in the DLC (which it comes with). Which (IMO) is not great for a horror game.. +Great ambiance +Escaperoom-Esque +Immersive -Pricey for content -Not actually horror as it says -Slow Paced 3/5 Good immersive game, but not worth the current price tag, would definitely get on sale.
